

ECOSOFT ERIC DML FLUSHABLE WATER FILTER

The ERIC DML is a high-performance sediment filter designed to tackle problem water effectively. It removes dirt, sand, and rust, ensuring cleaner and safer water for your home.

Manual flushable are making it long-lasting and cost-effective. It is also iron resistant, preventing clogging and maintaining optimal performance over timeintervention

WATER SOURCE: Tap or well water supply. For water with a high iron content

KEY FEATURES

- Ultra-fine filtration – 40-micron disc filters for long-lasting durability and efficient water purification
- Manual cleaning – Turn the lever to initiate the backwash or to stop it when finished
- Reverse backwash filtration – Loosens the discs for thorough and efficient cleaning

ADDITIONAL FEATURES

- Standard Connector Size – 1" G thread for easy compatibility w ¾"extra connector
- Wide Operating Temperature – Works in environments from 5° C to 40°C
- Operating pressure – Works efficiently with a pressure range from 1.5 bar to 10 bar
- Rinse outlet 3/8 inch

TECHNICAL SPECIFICATION

	ERIC DML
Flow rate, m3/hour	4
Connection	1"G thread male w 3/4 male inch extra connector
Drain line connection	3/8 collet
Working temperature, °C	+5...+40
Opeating pressure, bar	1.5 - 10
Cartridge	Polymer disks cartridge, 40 µm
Dimensions (L×W×H), mm	220 x 185 x 80

* DC - disk-type filter with manual flushing lite
