AQUABOX 20 T

FOR OFFICE

AQUABOX 20 T has been engineered to address the requirements of medium to large-sized offices. It can be connected to our water filtration systems, which are connected to tap water and provide great-tasting hot, chilled, ambient, or sparkling purified water.

APPLICATION: *Offices*

KEY FEATURES

- Dispensers by water types:
CAS – cold, ambient, sparkling
HCA – hot, cold, ambient
- Chilling capacity — 20 liters per hour
- Freestanding or countertop model
- Built-in leakage protection
- Customizing cold water temperature 4–12 °C
- Made from highest quality materials

DESIGN

The AQUABOX 20 T dispenser are characterised by a modern design: the black surfaces perfectly complement the silvercoloured ones, giving the dispenser an attractive look that fits into any kitchen or office. Thanks to their compact design and the possibility of having them in a countertop version (also with matching cabinet), they are easy and versatile to position.

TECHNICAL FEATURES

The AQUABOX 20 T is small but powerful, efficient and reliable: the functionality is intuitive and three different types of water are dispensed via practical buttons. An open condenser coil is located at the back, which allows for greater and easier heat exchange and thus the cooling of the cooler. The cooling capacity is up to 20 l/h, perfect for offices and also for the home.

INSTALLATION

The installation is very easy – all that is needed is a connection to the RO system and electricity supply. No connection to the drain is required because all models have a matching drip tray that can be fitted with an additional container in the cabinet.

Parameter	AQUABOX 20 CAS T	AQUABOX 20 HCA T
Item n° – WD black	AQUABOX20T/CAS	AQUABOX20T/HCA
Item n° – Cabinet black	AQUABOX20TCAB	
C – Cold	✓	✓
