

ECOSOFT AQUAPOIN AZURE WATER FILTER

Aquapoint Azure series represents the pinnacle of Italian filtration engineering, designed for professionals who demand uncompromising reliability and performance. This premium in-line filter features a sophisticated internal architecture optimized for maximum hydraulic efficiency. With over 20 years of manufacturing expertise, every detail—is crafted to ensure a consistent, high-volume supply of clean water even in challenging municipal environments.

WATER SOURCE: Tap water supply

KEY FEATURES

- **Italian Excellence:** Precision-engineered in Italy, leveraging two decades of specialized water treatment expertise for superior build quality.
- **Enlarged Flow Opening:** Features an optimized internal diameter to allow better water flow and significantly reduce pressure drops across the system.
- **Star-Shaped Head Design:** A unique internal geometry that ensures unrestricted water flow, preventing turbulence and maintaining high delivery rates.
- **Precision 2 mm Tip:** Integrated alignment guide ensures perfect centering of the filter element and a secure, leak-proof tightening of the housing every time.

The product is completed:

- Plastic bracket
- Service wrench
- Calendar
