

## ECOSOFT SEDIMENT WATER FILTER

A reliable and time-tested solution for basic water filtration in residential properties. These filters provide an essential first line of defense, effectively removing suspended particles to ensure clear water throughout the home.

**WATER SOURCE:** Tap water supply

### KEY FEATURES

- Total Home Protection: Stops sand, rust, and clay from damaging your faucets and appliances.
- Save on Repairs: Extends the lifespan of your washing machine and dishwasher.
- Stop Rust & Sand: Protects your plumbing from visible dirt and sediment.
- Premium European Quality: Made in Europe from food-grade, BPA-free plastic for maximum safety.
- Leak-Proof Design: Robust housing with high-quality brass ports for a secure connection.

**The product is completed:**

- Plastic bracket
- 5 micron polypropylene cartridge
- Service wrench
