

CAT TRANSPARENT CARTRIDGE WITH GAC

The CAT transparent cartridge with coconut shell granular activated carbon is designed for the removal of chlorine, chlorination byproducts and organic matter from the water.

It is used in both domestic (improve color, taste and odour of the water) and industrial (protection of RO membranes, anti-chlorine treatment for food, chemical, and pharmaceutical industries) applications.

KEY FEATURES

- Tasty water thanks to granular coconut shell carbon
- Contains a post-filter to retain carbon particles
- Made of non-toxic plastic suitable for food use
- Suitable for drinking water treatment
- Complies with DM25 standards (ITALY)

made in 
ITALY

Model	CAT
Filtration	Chlorine and organic matter removal, improvement of water taste and smell
Filtering medium	Coconut shell granular activated carbon
Inter core	Polystyrene
Valves	Polystyrene
Gasket	EPDM
Connection	DOE
Working temperature	From 4°C (39°F) to 35°C (95°F)
Cartridge type	Not reusable
Maintenance	None
Duration	3 months

Code	Size	Flow rate, l/h	Z	X	Y	Pieces in box
